

Defense & Security

Since a couple of decades we are a leading supplier of interconnection solutions for the defense and security market. Based on that experience we have now drastically expanded our product portfolio.

Beside our coaxial connectors we can deliver now also MIL-Spec series of connectors, which includes rectangular and round connectors.

A wide range of RF connectors up to 50 GHz (SMA, 2,92 & 2,4 mm, N, SSMA) is also available.

Our extensive portfolio of control components includes Hybridline, Splitters, Combiners, Hybrids, Attenuators, Terminations, Filters, Diplexer, Circulators, Isolators and Rotary Joints.

With over 300 designers world-wide for design, re-design, design-to-cost from hardware or software, for components, modules, sub-systems or systems we can fulfill all market requirements for developments for radar, data or microwave solutions.

For us TETRA is not an enclosure, but one of the leading wireless systems of the future!

Our state-of-the-art manufacturing plant (which is fully dedicated to the defense sector) with 2000 sm cleanroom class 1000 and 10000 is one of the largest in Europe for thickfilm, thinfilm and LTTC products.

With 110 dedicated employees we manufacture products such as LTTC's, power-, low noise- and wide band amplifiers, multiplexer, transponder, receivers, MCM's, converters and switches.

Today our projects are based on the most

diversified demands from our customers. Based on principles such as “build-to-print”, “build-to-spec”, “design-to-build” or “build-to-book” we can fulfill 1:1 our customers requirements.

Beside our certifications of ISO 9001, 9100 and 14001 we also hold the necessary NATO qualifications and other relevant standards.

We would be pleased to fulfill your requirements and are waiting for your request. Our project-team waits for your input!
